

Is this Correct in Ambient Air ?

UVC Output vs. Temperature Comparison

Is this Correct in Ambient Air for Hand-Held Disinfection Wands?

1. They state an average of 5 times the output of other ultraviolet devices".
 - "under HVAC operating conditions".

The Question / Problem when used in Ambient Air:

1. Their Hand Held Surface Disinfection Wand uses standard HVAC UVC Tubes.
1. **Our "Blade" Model TT-18-120 has UVC Tubes designed for Ambient / Room Conditions.**

Conclusion:

1. Their Hand Held Surface Disinfection Wand uses standard "HVAC" UVC Tubes.
2. **Our "Blade" Model UVC Tubes published performance is for "ambient room conditions".**

Consumer Note:

As HVAC Tubes are in ambient room temperatures, they get hot. Do not mistake heat with UV-c Germicidal Energy.
